

Contract Courses Lab Safety Integration  
Fall 2020  
Example Screenshots

Scenario 1: Mentor has a lab safety requirement and student has not yet completed the training.

## Contract Courses

---

The enrollment process for Contract Courses (independent studies with the guidance of a faculty mentor) begins on MyUCLA when students generate a "contract" for a course in their chosen subject area and field of interest.

As part of the process to create your contract, the system is checking with Environmental Health and Safety (EH&S) to confirm if you have completed the required workshop: Laboratory Safety Fundamentals. If you have completed the workshop, and your certification is current, you will be able to move ahead with creating your contract. If you have any questions about the Laboratory Safety course, please contact [UCLA Environment Health and Safety](#) via email: [training@ehs.ucla.edu](mailto:training@ehs.ucla.edu) or phone: (310) 794-1899.

According to Worksafe you have not completed the workshop. Completion of the workshop is required for working with your professor. Visit [Worksafe](#) to complete the Laboratory Safety Fundamentals Course. Please return here and refresh this page once you have completed the course. Note that it may take up to 24 hours for your result to be available.

Back

Scenario 2: Mentor has a lab safety requirement and training status is not available (should be rare).
